Professional Summary

WordPress Developer with **3+ years of real-world experience** designing, building, and maintaining CMS-driven websites across **WordPress, Drupal, and Craft CMS**. Strong in **custom theme and plugin development**, ACF/Gutenberg blocks, and performance optimization. Known for **debugging complex issues, fixing production bugs, improving Core Web Vitals, and resolving SEO/indexing problems** that directly impact traffic and usability. Comfortable working in fast-paced agency environments and delivering stable, scalable solutions using clean, standards code.

Work Experience

Web Developer | Senior WordPress developer

Fueint Technologies | 2022 – Present

- Developed **custom WordPress themes and plugins** aligned with client business requirements.
- Customized and extended existing themes and plugins while preserving **existing coding patterns and architecture**.
- Designed and implemented **custom ACF and Gutenberg blocks** to enable flexible, editor-friendly content management.
- Built and maintained **custom post types, taxonomies, and template logic** for complex content structures.
- Diagnosed and resolved **critical production issues**, including layout breaks, JavaScript conflicts, plugin incompatibilities, and CMS-related bugs.
- Conducted **QA testing and regression checks** to ensure fixes did not introduce new issues.
- Optimized performance using caching strategies, asset optimization, and code refactoring, improving **Core Web Vitals** (LCP reduced by ~30%, CLS improved by 0.05).
- Identified and fixed **SEO and indexing issues** in Google Search Console (coverage errors, canonical issues, structured data warnings), increasing organic traffic by ~15% on average.
- Provided ongoing **maintenance, monitoring, and troubleshooting** for live websites.
- Applied **security patches and CMS updates** across WordPress, Drupal, and Craft CMS projects.
- Collaborated with designers, QA teams, and backend developers to ensure **consistent front-end and back-end integration**.

Key Achievements

- Resolved **high-priority client-reported issues** under tight deadlines without breaking existing functionality.

- Debugged and fixed **ACF, Gutenberg, and short code related conflicts** caused by theme and plugin interactions.
- Investigated and corrected **Core Web Vitals failures** by identifying render-blocking assets, layout shifts, and inefficient queries.
- Fixed **SEO and indexing blockers** that prevented pages from appearing in search results, directly improving visibility and traffic.
- Refactored legacy code to follow **WordPress coding standards**, improving long-term maintainability.
- Delivered scalable solutions using **hooks, filters, and reusable components**, reducing future development effort.
- Successfully handled **cross-CMS projects (WordPress, Drupal, Craft)**, adapting quickly to different architectures and workflows.

Notable Projects

- **Unbounce** – <https://unbounce.com/>
Performance fixes, CMS enhancements, and ongoing maintenance support.
- **Intiveo** – <https://intiveo.com/>
Custom WordPress development and content structure improvements.
- **Open Government Partnership (OGP)** – <https://www.opengovpartnership.org/>
Large-scale CMS management, content handling, and performance optimization.
- **Open Gov Week** – <https://www.opengovweek.org/>
Feature enhancements and layout fixes for campaign-based content.
- **OGP Stories** – <https://www.ogpstories.org/>
Custom templates and CMS-driven storytelling features.
- **PPIC** – <https://www.ppic.org/>
Performance improvements and SEO-related fixes.
- **Traction Complete** – <https://tractioncomplete.com/>
WordPress customization and site maintenance.
- **Loopio** – <https://www.loopio.com/>
CMS enhancements and front-end issue resolution.
- **Uptempo** – <https://www.uptempo.io/>
CMS enhancements and accessibility fixes.
- **Elastic Path (Craft CMS)** – <https://www.elasticpath.com/>
Craft CMS development with **accessibility and performance focus**.
- **Premier Boxing Champions (Drupal)** – <https://www.premierboxingchampions.com/>
Drupal maintenance, security updates, and bug fixes.

Skills

Front-End Development

- **Languages:** HTML, CSS (Bootstrap, Tailwind, SCSS/SASS), JavaScript (jQuery, React.js).
- **UI/UX Tools:** Figma for design collaboration.

Back-End Development

- **Technologies:** PHP, MySQL.
- **WordPress custom theme & plugin development, ACF/Gutenberg block creation, performance optimization**
- Drupal custom module development & security maintenance
- Craft CMS accessibility-focused development (W3C standards)
- PHP & MySQL application development.
- Accessibility-focused development following W3 guidelines.

Optimization & Testing:

- SEO, Google PageSpeed Insights, Google Search Console, Manual Testing.

Version Control & Deployment

- **Git** for version control.
- **Hosting Platforms:** Pantheon, WP Engine, Kinsta, Servd, and Manage DevOps provide server environments.

Educational Background

Bachelor of Engineering (B.E.) – Computer Science Engineering

Vidyaa Vikas College of Engineering & Technology (Anna University, Tiruchengode)

Graduated: 2020 | **CGPA: 7.04**
